

Modern mixing solutions for crystallization

We will talk about how to achieve a good crystallization product from an agitated process and - more in detail - how a well-designed mixing system can contribute.

Webinar

October 17,
2024

3.00 – 3.45 pm
(CEST)

Free of
charge

We will speak about general design rules as well as practical examples:

- Crystallization basics and mixing tasks
- Design criteria for an industrial crystallizer
- Trials and/or CFD modeling to scale-up a crystallizer
- Examples: agitated crystallizers in process industry

Objectives

EKATO consults and accompanies its customers throughout their entire customer journey. Starting with the initial idea, through possible trials and subsequent scale-up into the industrial mixing process, to the actual mixing system - or even to the turnkey process plant.

In this webinar we want to show how to proceed if you have to develop this “not so easy” unit operation. Knowing the design rules and using the right tools form the basis for a reliable agitated crystallizer.

Target Group

General managers, process engineers, R&D specialists, production managers, buyers, project managers as well as anyone interested in process development, equipment engineering and production improvement.
